Slate - Stone Shower Tray

NATURAL SLATE-EFFECT | TEXTURED | SOLID STONE TRAY

CITYLux

Our super-strong Slate-Stone Shower Trays are produced from a mixture of natural stone and marble resins/powders, a quality shower tray that is built to last.

These trays can be fitted like a normal shower tray however they are strong enough to be laid directly onto floor joists (support perimeter), giving a flush finish to achieve that desirable wetroom look.

Premium Range of Bathroom Taps...

*Enhance your Bathroom with
the perfect finishing touches...*

Our Range of Tap Solutions combines superior quality with over 40 great designs to choose from, offering functionality, durability and real value for money

Cold Start Technology

Look out for this logo on for basin mono's that have this Energy and Cost Saving Feature

Most basin mixer taps when operated even if turned to cold, will fire up the boiler. Cold Start Technology allows cold water to pass through the tap without firing up your boiler.

10 Year Manufacturers Guarantee

Brassware and all components are rigorously tested to ensure high levels of quality and durability. We use corrosion resistant grade A, 3.03m thick die casting brass with an exceptional high strength one piece cast. Cartridges are a serviceable part and come with a 3 Year Guarantee.

Water Pressure:

All taps operate 0.2 to 6.0 bar unless stated otherwise.

LP = Low pressure of 0.2 bar minimum.

MP = Medium pressure of 0.5 bar minimum.

HP = High pressure of 1.0 bar minimum.

Easy Clean Wastes Included

Most of our Basin Mono's include a click clack waste, that lifts out for Easy Cleaning. For more Waste options see pages

172 - 173

Directional Aerator

Look out for the Directional Aerator logo, for Basin Mono's that have an aerator that swivels to the touch, allowing the flow of water to be pointed in a different direction.

Ventilation Fans

Remove excess humidity and moisture from your bathroom

Combat the harmful effects of condensation...

Building Regulations

Comply with Building Regs: Document F Ventilation 2010. Our fans exceed Building Regulations

CONDENSATION

Without proper ventilation, there is a risk of developing mould and mildew which can be damaging to your health.

DAMAGE TO YOUR HOME

Over time, condensation and moisture can be damaging to your bathroom and home:

- Rust on metal fittings
- Damage / swelling to wood
- Paint & wallpaper deterioration

MOULD & MILDEW

Risk of developing mould and mildew which can be damaging to your health. Microscopic mould spores can be inhaled, triggering asthma, allergies and skin disorders.

3 Models to choose from...

iC Fan

Sleek and stylish appearance
Flexible installation - many modules to choose from
Low energy options
Easy fitting

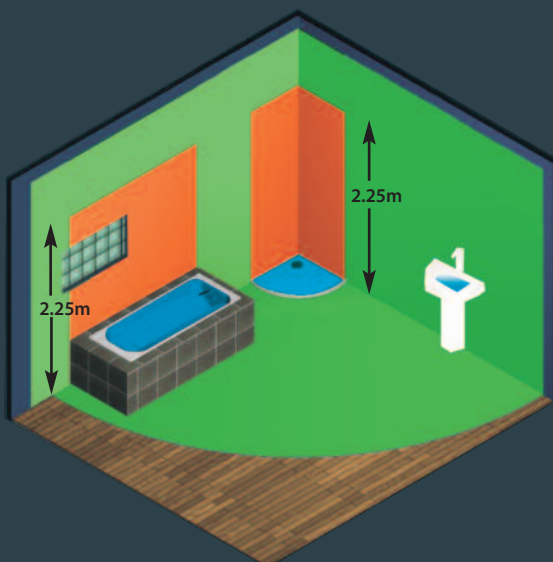

Quiet Fan

Whisper quiet
Powerful extraction
Various control options
Room refresh option
Backdraft flap

Vent Fan

Compact size

Where can you position your fan?

Fans can be Ceiling or Wall Mounted

Fans should be positioned to give optimum flow of air through the whole room, consider the position of window openings and doors. DON'T FORGET a fan can only extract air if there is air coming in to replace it. Undercutting of doors may be needed to allow air into the room.

Fans should be mounted as high as possible, well away from primary heat sources such as gas water heaters and boilers.

- Zone 0:** No fan suitable
- Zone 1:** Recommended any Quiet Fan or iCON 12v eco fan.
- Zone 2:** Any iC, Quiet or Vent Fan.
